

"Achieved production budget at a significantly lower cost"

Budgeting and forecasting can be tricky business, but we have proof that implementing a predictive maintenance program with DINGO's support can quickly yield real, measurable financial results.

"I am very pleased with where the program is today and where we are headed. It did not take long for the team to realise and appreciate the benefits of the DINGO program and the results speak for themselves. We achieved budget for production last year and did it at a significantly lower cost than budget as well - both EBITDA and FCF exceeded forecasts/budgets."
